AST Technology Advances “Design for Manufacturing” System

Herford, Germany – AST Technology has advanced its systemization of its Design for Manufacturing (DFM) review services to support OEM companies through the product design development process.

During the DFM process, AST performs assessments on a plastic part component’s design structure, material selection, tooling and injection molding processes to establish and implement improvements with training support.

Training is provided to customers across all areas of plastics technology, from introductory to advanced levels and for processors, engineers and managers of all skill levels.

To speak with an AST representative, call +49 (0) 5221 7630695 or email Contact@AST-Tech.de.

About AST Technology:

Established in 2008 and based in Herford, Germany, with staff also located in the U.K., AST Technology conducts specialist training, component DFM support and tooling development & standardization through its customers’ global manufacturing networks. AST Technology is a business unit of the PCIC Group of companies. To find out more, visit www.ast-tech.de.
